Please complete this post-study questionnaire immediately after using the PARA app. This questionnaire is based on the Computer System Usability Questionnaire (Lewis 1995).

This questionnaire gives you an opportunity to tell us your reactions to the PARA app. Your responses will help us understand what aspects of the app you are particularly concerned about and the aspects that satisfy you. Think about all the tasks that you have done with the app while you answer the questions. Please read each statement and indicate how strongly you agree or disagree with the statement by circling a number on the scale. If a statement does not apply to you, circle N/A. Please write comments to elaborate on your answers. Thank you!
